

DIGITAL CITIZENSHIP

STUDENT RESPONSIBLE USE AGREEMENT

Please read this agreement with your child to assist their understanding of the concepts outlined below.

I understand that:

1. Digital technology tools are tools for learning.
2. The school has a filter to keep us safe, but if I find anything unsafe or inappropriate, I will turn off the screen and report it to a teacher immediately.
3. I am not allowed to access or download material through the internet which is offensive, dangerous, inappropriate for school or illegal. I am not allowed to download extensions or popups on any school device.
4. I am not allowed to access any other student's account or personal information.
5. When I use any digital technology tool, including Seesaw, to display, publish or share my work, I will only record things related to my learning that I would be happy for my parents and teachers to read.
6. I may only use a digital tool/device when permission is given by a teacher. Devices will not be used before school, during morning tea or lunch breaks unless specified by my teacher.
7. I must immediately report to a teacher any misuse of digital devices.

I understand how important it is to:

- Turn off the screen showing any inappropriate content I come across and tell a teacher immediately.
- Check with the teacher before I download, copy or share any files, photos, videos or music from the internet.
- Never give anyone on the internet information about myself or anyone else. This includes address, phone number, photograph, age and passwords.

As an A.C.T.I.V.E learner:

A: I will be adventurous when using new digital technology and think of creative ways that enhance my learning.

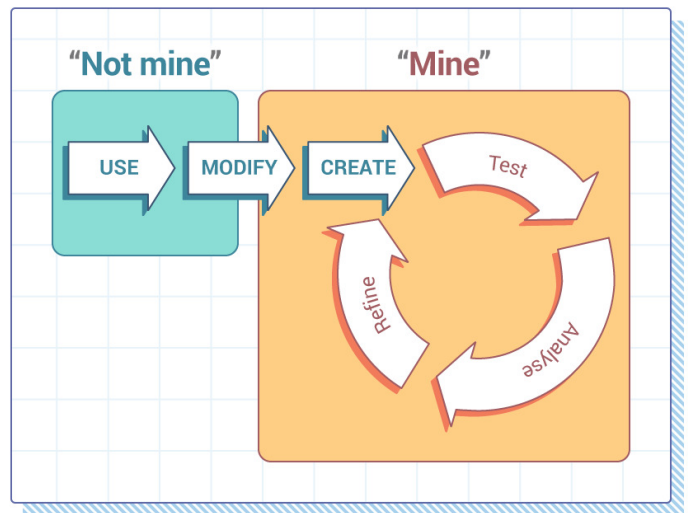

C: I will use digital technology as a collaboration tool when it is appropriate for my learning.

T: I will remember T.H.I.N.K before sharing (Is it True, Helpful, Inspiring, Necessary or Kind?)

I: I will use technology in new innovative ways through exploration. For example, I can use technology and modify it to suit my learning then use the device to create an end product.

V: I will respect all digital technology equipment and I will value my privacy and keep my passwords to the school network and any other programs used secure and private.

E: I will use digital technology in ways that have a purpose and supports my learning.

Please sign below to acknowledge that you have read this agreement with your child and assisted them to understand the concepts outlined, and that your child also understands:

- This agreement applies whenever a Warkworth School account is used, whether signing in from home or school.
- Failure to exercise responsible digital citizenship will result in their use of digital tools being restricted and that their parents or caregivers will be notified.
- It is illegal to have a Facebook, Instagram or any other social media account until they are 13.
